SMC-G Video Service Management System

■ Product Overview

The SMC-G new generation video service management system, providing the whole network video conference equipment unified management, media resource unified scheduling, easy to use management and control and visual operation and maintenance management functions. It adopts service-oriented architecture, with high performance, large capacity, elastic scalability, and can meet the needs of various scale video conferencing.

■ ■ Technical Specifications

Protocols and Annotations	
Multimedia Framework Protocol	ITU-T H.323, IETF SIP
Other standards and protocols	H.225, H.245, Q.931, H.235, SDP, TLS/SRTP, H.239, BFCP H.460, ICE, STUN, TURN, SNP (Huawei proprietary technology), SIP TRUNK TCP/IP, HTTP, HTTPS, SSH, LDAP/H350, TR-069, SNMP, RTP, RTCP, DDNS
System Performance	
Maximum number of concurrent conference ports	20,000
Maximum number of provisioned users and conferences	1,000,000
Language	
Language	Chinese, English, French, Portuguese (Latin America)
Mode of Deployment	
Deployment mode	Hardware and software integrated deployment: SMC basic machine (less than 10,000 users) SMC High-Capacity Basic machine (less than 1,000,000 user scenarios) Software deployment (based on Kylin OS) Virtualization deployment (based on VMware or Huawei FusionCompute) Cloud deployment (based on Huawei HCS or Huawei HCSO)
Software License	Number of devices managed Number of registered H.323/SIP hardware devices (including MCU, recording and broadcasting, and hard terminal) Registered number of soft terminals/concurrent calls of soft terminals (one of two options) · Public/private network traversal bandwidth Number of MCU concurrent ports Number of concurrent access by third-party advanced users (including VDC clients and other clients) · Monitor the number of converged access channels Dual system license Dr Permit Number of voice recognition meetings
